

HEAR THE DIFFERENCE.

Try one on today and instantly hear the difference for yourself.

(shown actual size)

IT'S NOT YOUR FATHER'S HEARING AID.

Miracle-Ear's most advanced hearing technology includes:

- » High-speed feedback cancellation
- » Digital noise suppression
- » Digital speech enhancement
- » Wireless technology maintains the natural time and level differences between ears, matching volume levels and microphone settings.

Available pocket remote to let you control settings more conveniently.

*Hearing aids do not restore natural hearing. Individual experiences vary depending on severity of hearing loss, accuracy of evaluation, proper fit and ability to adapt to amplification. A Miracle-Ear® representative can determine which models and options may be right for you.

A DIFFERENCE ONLY YOU WILL NOTICE

THE ME950 OPEN
ME950 RIC

The revolutionary new ME950 OPEN & 950 RIC

ME950 OPEN: MORE NATURAL LOOKING, MORE NATURAL SOUNDING.*

- » **More natural looking**, because ME950 Open uses an inconspicuous thin tube and a compact case that fits comfortably and nearly out of sight behind the ear.
- » **More natural sounding**, because the open-fit design doesn't feel like it's plugging up your ear canal.
- » **Intelligent Peak Smoothing™** automatically identifies and suppresses sudden noises, such as clanging dishes, to make your everyday listening more comfortable.
- » **Data Recall™** tracks your usage, so your Miracle-Ear consultant can precisely fine tune the instruments to your personal needs and preferences.
- » **Digital noise reduction** automatically reduces background noises, making listening in noise more comfortable.
- » **Wireless technology** eliminates the need to manually synchronize volume levels and microphone settings between two hearing aids.
- » **Smart VC™ (volume control)** "learns" your volume preferences and then adjusts automatically to different listening environments.
- » **Directional Microphones** automatic, multichannel, adaptive directional microphones automatically adjusts to allow you to hear conversation with less straining.
- » **3-year warranty**** and **comprehensive aftercare program** to help ensure a better return on your investment, as well as total peace of mind.

ME950 RIC: JUST RIGHT FOR ACTIVE LIFESTYLES.

As small and discreet as the ME950 Open is, the ME950 RIC with receiver in the canal (RIC) is even smaller and more inconspicuous. That's because the receiver, or speaker, is placed directly in the ear canal instead of inside the hearing aid case. ME950 RIC is so compact, it's virtually undetectable to others. In fact, the only thing your family and friends will notice is how much better you're hearing!

There's a lot more to like about ME950 RIC besides a low profile, such as:

- A special nanocoating, combined with other protective features, makes ME950 RIC more moisture-resistant than other hearing aids — ideal for active, outdoor lifestyles.
- Wish you didn't have to change batteries? A rechargeable battery option means you won't need to fuss with changing batteries!
- ME950 RIC, when equipped with our Smart VC™ (volume control), "learns" your volume preferences and then adjusts automatically to different listening environments.
- If your lifestyle takes you to noisy places, you'll appreciate how the available directional microphones allow you to hear conversation with less straining.

MORE POWER TO YOU.

Here's more great news about ME950 RIC: We've added power to our receiver choices, giving your Miracle-Ear representative greater flexibility in fitting a wide range of hearing losses. Even if you have a severe hearing loss, chances are good you can enjoy all the benefits of the ME950 RIC.

To learn more about ME950 Open and ME950 RIC, please call or visit an authorized Miracle-Ear location.

BONUS! If ME950 Open or ME950 RIC is right for you, you could walk out the door with better hearing on the same day you come in. That's because there's no factory order to place and no earmolds to make. Talk about instant gratification!
