About hearing

- 1 in 10 people has difficulty understanding, especially in noisy environments.
- Hearing starts to decline when you are in your 40s.
- 8 out of 10 people with impaired hearing do not take any action to find a solution, even though one is close at hand: the new microStyle generation.

About you

Are you one of the many people who thought the only answer to a hearing problem came in the form of unattractive, bulky hearing instruments? Prepare to change your mind...

Kathrin is wearing a microStyle hearing instrument from Phonak. Why are we telling you this? Because even on this close-up photograph, it is hardly visible.

Invisible design meets performance

The Phonak microStyle generation combines unsurpassed hearing performance with unique design:

- Unbelievably invisible
- Easy listening in difficult hearing situations
- Natural sound
- Hassle-free automatic functionality
- Comfortable to wear
- Long battery life
- Proven quality
- Personalized to meet your hearing and budget needs

Contact your hearing care professional to find the ideal microStyle solution for you. Look carefully or you may miss it!

Cleverly designed ...

The new microStyle hearing instruments are small and feather-light. They disappear behind your ear and you forget you are wearing them – until you hear the astonishing difference they make.

optimal invisibility

The ergonomic design, combined with the extremely thin tubing, results in a uniquely satisfying cosmetic solution. The practically invisible micro tube fits the contours of your ear perfectly and leaves the ear naturally open.

If you wear glasses, the slim shape of the housing allows the instrument to sit neatly behind your ear without obstructing your glasses in any way.

actual size

... but it is not all about size!

Despite their incredibly small size, the microStyle hearing instruments contain the most sophisticated technology currently available on the market.

Unique Phonak high tech features meet all your hearing challenges, in all the situations that make up your lifestyle. Enjoying a social gathering or business meeting, without annoying echo or background noise, are given with the microStyle generation of hearing instruments.

In addition, each device intelligently monitors your environment, then automatically adapts itself to give you all-round, hassle-free listening.

The Phonak microStyle generation comes in a wide color-range.
